| <b>Location</b>                          | State – Jharkhand                                                                                                                                                                                                                                             |
| <b>Event/ Activity Name</b>              | On the occasion of the International Year of Cooperatives - 2025, Soil Testing Campaign was organised in the Dudhni village of Jharkhand.                                                                                                                     |
| <b>Brief Information on the Activity</b> | A soil testing campaign, was organised in which the Area officer, IFFCO met with the farmers of Dudhni village and discussed about the soil and went to the field to explain the method of collecting soil samples. He requested everyone to collect samples. |
| <b>Objective</b>                         | To explain the method of collecting soil samples and educate farmers on the benefits of nano fertilizers for sustainable and cost-effective agriculture.                                                                                                      |
| <b>No. of Participants</b>               | 80                                                                                                                                                                                                                                                            |
| <b>Achievements &amp; Outcomes</b>       | Soil testing campaigns are being organized in various villages across the country. As part of this initiative, farmers are informed about the correct method of collecting soil samples and the benefits of soil testing in effective fertilizer management.  |

| <b>Event/ Activity Name</b>              | On the occasion of the International Year of Cooperatives 2025, a district-level cooperative seminar on bio-fertilizers and nano-fertilizers was organized by IFFCO Madhya Pradesh in Dewas district.                                                                                                                               |
| <b>Brief Information on the Activity</b> | As a part of the IYC 2025 Celebration, a district-level cooperative seminar on bio-fertilizers and nano-fertilizers was organized by IFFCO Madhya Pradesh in Dewas district, in which 50 cooperative managers associated with five branches of the District Cooperative Central Bank from the Dewas development block participated. |
| <b>Objectives</b>                        | To educate cooperative managers on the application and benefits of bio-fertilizers and nano-fertilizers for promoting sustainable agriculture.                                                                                                                                                                                      |
| <b>No. of Participants</b>               | 50                                                                                                                                                                                                                                                                                                                                  |
| <b>Achievements &amp; Outcomes</b>       | Enhanced understanding among cooperative managers about sustainable farming through nano fertilizers and bio-fertilizers; encouraged adoption of cost-effective, eco-friendly agricultural practices.                                                                                                                               |
| <b>Photograph</b>                        |                                                                                                                                                                                                                                                 |
| <b>Additional Remarks</b>                |                                                                                                                                                                                                                                                                                                                                     |

## International Year of Cooperatives 2025 (IYC-2025): Key Activities and Achievements during April 2025

| Criteria                                 | Details                                                                                                                                                                                                                                                                                                               |
|------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                            | Cooperative                                                                                                                                                                                                                                                                                                           |
| <b>Location</b>                          | Gujarat                                                                                                                                                                                                                                                                                                               |
| <b>Event/ Activity Name</b>              | On the completion of 50 years of the IFFCO, Kalol plant, the Hon'ble Minister of Home and Cooperation rededicated the plant to the farmers of the nation as part of the International Year of Cooperatives – 2025 celebrations.                                                                                       |
| <b>Brief Information on the Activity</b> | Golden Jubilee Celebration of IFFCO's mother unit and its first Urea Plant Complex along with the foundation stone laying ceremony of the "Beej Anusandhan Kendra" at Kalol, Gujarat.                                                                                                                                 |
| <b>Objectives</b>                        | This significant occasion served as a platform to further strengthen the cooperative movement and its contributions to the agriculture sector. Through this program, we honored the remarkable contributions made in the fields of cooperation and agriculture and engaged in discussions to make them even stronger. |
| <b>No. of Participants</b>               | 3000                                                                                                                                                                                                                                                                                                                  |
| <b>Achievements &amp; Outcomes</b>       | Celebrated 50 years of cooperative excellence of IFFCO's Kalol Plant and its first Urea Plant Complex along with the foundation stone laying ceremony of the "Beej Anusandhan Kendra" at Kalol, Gujarat.                                                                                                              |
| <b>Photograph</b>                        |                                                                                                                                                                                                                                                                                                                       |
| <b>Additional Remarks</b>                |                                                                                                                                                                                                                                                                                                                       |

| <b>Event/ Activity Name</b>              | As a part of the IYC 2025 Celebration, A workshop on the use of nano fertilizers was organized by IFFCO Merta City. The program was presided over by Director, IFFCO, New Delhi. State Distribution Manager, IFFCO Jaipur, provided detailed information on the use and importance of nano fertilizers. |
| <b>Brief Information on the Activity</b> | Detailed information was given about nano fertilizers, benefits of soil testing and taking soil samples from the field.                                                                                                                                                                                 |
| <b>Objectives</b>                        | To educate farmers on the benefits of nano fertilizers for sustainable and cost-effective agriculture                                                                                                                                                                                                   |
| <b>No. of Participants</b>               | 100                                                                                                                                                                                                                                                                                                     |
| <b>Achievements &amp; Outcomes</b>       | Participants gained in-depth knowledge on nano fertilizers and soil sampling for sustainable and cost-effective farming.                                                                                                                                                                                |

| <b>Additional Remarks</b>                |                                                                                                                                                                     |

**International Year of Cooperatives 2025 (IYC-2025):**  
**Key Activities and Achievements during April 2025**

| Criteria                                 | Details                                                                                                                                                                               |
|------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                            | Agriculture                                                                                                                                                                           |
| <b>Location</b>                          | State – Assam                                                                                                                                                                         |
| <b>Event/ Activity Name</b>              | A Crop Seminar was conducted in Nano Village, Badulipar, Golaghat, Assam.                                                                                                             |
| <b>Brief Information on the Activity</b> | The program included discussions on the benefits and usage of nano fertilisers.                                                                                                       |
| <b>Objectives</b>                        | To raise awareness of Cooperative Principles and educate farmers on the benefits of nano fertilisers.                                                                                 |
| <b>No. of Participants</b>               | 200                                                                                                                                                                                   |
| <b>Achievements &amp; Outcomes</b>       | Participants gained knowledge on sustainable and cost-effective agricultural inputs, enabling them to guide farmers in adopting these innovative solutions in their respective areas. |
