DISTRICT: Patiala

Criteria	Details
Sector	Primary Agriculture Cooperative Society (PACS)
Location	District Patiala
Event/Activity Name	Role of Crop Diversification in Soil Conservation under Guidance of DRCS, Patiala.
Brief Information on the Activity	Awareness Camp for providing knowledge to farmers regarding how PACS can facilitate crop diversification for soil conservation.
Date of Event	May 9 th , 2025
Objective	Role of Crop Diversification in Soil Conservation
No. of Participants	45
Achievements & Outcomes	<p>Farmers made aware to use PACS for crop diversification and make PACS as hub for crop diversification activities on ground level.</p> <p>Primary Agricultural Cooperative Societies (PACS) can promote crop diversification, which is a key strategy for improving soil health. By diversifying crops, farmers can reduce reliance on a single crop, minimize soil erosion, and enhance soil fertility through practices like intercropping and legume planting. Here's how PACS can facilitate crop diversification for soil conservation-</p> <ol style="list-style-type: none"> 1. Providing Credit and Financial Services: PACS can provide farmers with access to credit for purchasing diverse seeds, fertilizers, and other inputs needed for diversified cropping systems. 2. Supplying Inputs and Services: PACS can act as a source of high-quality seeds, fertilizers, and pesticides, which are essential for successful crop diversification. 3. Providing Technical Support: PACS can offer farmers guidance on appropriate crop rotations, intercropping techniques, and other soil conservation practices. 4. Promoting Sustainable Agriculture: By promoting crop diversification, PACS can contribute to the broader goals of sustainable agriculture, including soil health, water conservation, and climate resilience. 5. Empowering Small and Marginal Farmers: PACS can empower small and

marginal farmers to adopt diverse cropping systems, which can increase their income and resilience to market and environmental fluctuations.
